PROJECTS

KIT // Fully responsive full stack web application. <https://github.com/fionahenley/kit>

- Assisted team in integration of front end functionality with backend technologies.
- User friendly application created using Express, Express handlebars, MySQL2, sequelize, javascript, cloudinary, dotenv, Bcrypt technologies.
- Motivation behind KIT was fueled by the genuine friendships made during the hardships of our course in order to ensure our class created a platform that would allow us to share our successes throughout time.

EMPLOYEE GENERATOR // Employee Roster Application in Node.JS <https://fionahenley.github.io/employeemod10/>

- Application for business owners to view and manage their departments, roles and employees to organize and plan.
- Created and tested using Javascript, Node.js, Jest.

WEATHER APP // Web Application <https://fionahenley.github.io/weather-api-shitshow/>

- A web application that reads current weather data for up to five days, displays relevant data visualizations and features REST API. Built using Javascript, HTML, CSS and more.

CALCULATOR APP // Web and Mobile Application

- Calculator App built using Javascript frameworks to conduct math equations, can function on both mobile and web.
- Functions consist of basic operations like addition, subtraction, multiplication and division, supporting decimal values; operations like calculating the square of a number can also be performed.

SKILLS

Languages- JavaScript, ES6, Python, HTML5, SCSS, CSS, SQL

Frameworks/Libraries- jQuery, JSON, React.js, Bootstrap, Angular, Bulma, Handlebars, GIT , Express/Node.js, Heroku

Databases- MySQL, NoSQL, MongoDB

Practices - Responsive Web Design, Test-Driven Development, RESTFUL API, UX/UI design, Product prototyping, Shopify, Shopify 2.0
